

exception/invalidAge
/invalidAge.h

```
graph TD; A["exception/invalidAge/invalidAge.h"] --> B["iostream"]; A --> C["exception"];
```

The diagram illustrates a header file inheritance structure. At the top, a gray box labeled 'exception/invalidAge/invalidAge.h' has two blue arrows pointing downwards to two white boxes: 'iostream' on the left and 'exception' on the right. This indicates that the 'exception/invalidAge/invalidAge.h' header file includes or inherits from both 'iostream' and 'exception'.

iostream
